

Preentation

Our partners

Founded in 1993, as agent and distributor of world leader brands, in , heat shrinkable polymers; such as Raychem (the inventor) This invention found many applications as cables accessories and anti-corrosion coatings.

From then on, STI was constantly expanding its range of products and solutions in order to satisfy local requirements, by keeping a «technology watch» on new technics qnd products in energy sector.

Range of products are as follow:

- Cables accessories.
- Grounding and exothermic welding.
- Lightning protection systems.
- LV and MV fuses.
- Cables preparation and installation tools.
- Cables sealing systems.
- Instrument transformers.

Energy cables accessories for all voltages from power plant to the ladt user
Terminations, joints, insulators, grounding, surge arresters....

• Advanced technologies for lightning protection systems
Prevectron® is among several other models
• Aerial markup.

Products and accessories for grounding and exothermic welding

Sealing solutions for cables and pipes
Used with satisfaction in Télécom, energy and Oil & Gas

Fuses for MV electrical network.
Approved by CREDEG for Sonelgaz network.

Voltage transformers &
Current transformers
Instruments transformers for
LV and MV equipments,
Insulators

Equipment
for cables laying
and
installation
