Presentation

Since 1993, STI has forged partnerships with big names in the Oil & Gas sector and related activities to complete its range in order to supply projects with various products and equipment listed in the following Specialties:

- Coatings: Heat shrinkable, cold applicable and bi-component epoxy.
- Cathodic protection.
- Pipeline accessories.
- Grounding and exothermic welding.
- Sealing of cable entries.
- Lightning protection system.
- Measuring and control devices.

STI has locally developed several products for pipeline construction and maintenance projects. Pigs and foam pistons of different types and densities

Protection cathodique

Transformers-rectifiers and several types of anodes).

Other STI activities:

- Supply of material, equipment and accessories for electrical network (LV, MV, HV).
- Cable accessories. (terminations, joints, lugs, connectors)
- MV and LV fuses.
- Preparation tools and cable installation.
- Instrument transformers (voltage and current)

STI in numbers

Share capital:	165 MDZD

Client portofolio :	+2500 clients
Offices:	400 m ²
Warehouse:	1600 m ²

ASSET MANAGEMENT FOR OIL & GAS INDUSTRY
TECHNO PROTECTION
ALGÉRIE

Partner and leader in Algeria in the field of engineering, diagnosis, expertise and training in cathodic protection. Managed by its founder and owner, NACE level IV specialist for almost 20 years

Provide lightning protection systems with the most advanced French technology in the field.

Over 50 years of experience in grounding and thermite / exothermic welding.

Unique and patented modular cable entry sealing systems, mainly used in telecom and petrochemical complexes.

The only hand tool in the world that can achieve the near white steel surface quality according to Swedish standard SA2.5 Available in electric and pneumatic version.

PA-EL is a Croatian company involved in the design and manufacture of equipment for cathodic protection.

Ex-Raychem world leader in anti-corrosion coatings:

- Heat shrinkable (Raychem).
- Cold applied sleeves (Polyken).
- Bi-component epoxy (Powrecrete)..

Leader in repair, reinforcement of metal loss and leakage stopping under load by composite materials

T.D. Williamson

TDW provides safe solutions and leading edge for hot tapping systems worldwide for over 100 years

Pipeline accessories for casing crossing (insulator, spacers and end-seals)

Leader in the "Pin brazing" soldering system

innovator of an induction machine for old coatings removal from metal substrates (pipeline, bridges, offshore platforms)

Confirmed know-how and large experience in Intelligent pig pipeline inspection
